

### **ESSENTIAL,**

is the ideal aquarium fish farm solution for fish companies and restaurants that wish to offer their customers the freshness and flavour of the sea. **Essential** is a combination of quality, functionality and financial investment. Simple management and low maintenance, give Essential the winning formula with minimum financial outlay. Fitted with an innovative cooling system, consisting of a single block, which meets the expectations of the most demanding customers.

The refrigeration power, is **30% greater** than market requirements, making this an efficient unit with low power consumption.

It is fitted with a titanium exchanger, and an outer covering to prevent sea water corrosion. Moreover numerous integrated functions allow for safe and accurate management of the aquarium fish farm. The single block is pre-designed to allow for the installation of a "heater" (internally) and U.V.-C. lamp, if required. The winning formula of Essential can be summed up as follows : a quality product, with a simple and careful design , simple but elegant, high quality and easy to manage.

Due to its huge success, **Essential** can be placed among the low-cost range products, but its technical performance and design characteristics are for **those who don't want to compromise.**

**Essential, cost saving without having to compromise.**

#### Technical Characteristics

- Power: 220V.
- Isolated glass processing bath.
- Corners in 316 satin stainless steel to protect the glass crystal bath.
- Stratified perlon wool pre-filter plate.
- Active biological filter with Lithothamnium calcareum alga.
- Structure : 316 satin stainless with two front doors.
- Low energy consumption pump.
- Hyperactive carbon filter.
- Ecological gas refrigeration unit.
- Titanium evaporator digital display thermostat.
- Hydraulic system in PVC.
- Electric system to specification, with fire resistant cables.

#### Technical characteristics single block cooling:

- A "silent" function in order to enhance the quietness of the unit.
- Air filter obstruction alarm.
- U.V.-C Lamp alarm (if present).
- U.V.-C lamp activation ( if present).

#### Dimensions:

- Aquarium fish farm: cm. 103x53x147h
- Processing bath: cm. 103x53x50h

#### Optional:

- Ultra violet sterilisation system.
- Lighting system.
- Wheels.
